Take out a printout of this sheet and write answers to the questions on it.

EVS

NAME _____ **CLASS & SECTION** _____ **ROLL NO** _____

Case study 1

Read the paragraphs and answer the Questions that follow:

Life is not possible without water. Our body is made up of 70% of water. The excessive loss of water from our body on a hot day causes dehydration. All sources of water depend on rain. When it rains, water collects in ponds, lakes and rivers. Rivers take water to the seas and oceans. Some rainwater goes deep inside the ground and we get this water through wells, handpumps and tube wells.

Q1. Define dehydration.

Ans _____

Q2. What are the various sources of water?

Ans _____

Case Study 2

Leaves make food for the plant. All green leaves have a pigment called chlorophyll. Leaves get their green colour due to this pigment. They combine carbon dioxide, water and sunlight in the presence of chlorophyll to make food. This food making process is called photosynthesis. Since the leaves make food for the plant, they are called the 'kitchen of the plant.'

Q1. How do leaves make their food?

Ans _____

Q2. Why do leaves look green?

Ans _____

Take out a printout of this sheet and write answers to the questions on it.
